# QuickTime sample files

This document links to sample movie files in several formats.

This article has been archived and is no longer updated by Apple.

To save a sample file to your computer, Control-click (or right-click) the icon of the file to open a contextual menu, then choose the option to download or save the file. The file is compressed as a ZIP archive, so it must decompressed before using it with apps like QuickTime Player. If you're using iTunes to play back movies, you need iTunes 5 or later.

| QuickTime filename | File format | File size | Download | Notes |
|---|---|---|---|---|
| sample_iPod.m4v Encoded for iPod | H.264 | 2.1 MB | | Requires QuickTime 7 or later. |
| sample_iTunes.mov | MPEG-4 | 2.8 MB | | Requires QuickTime 6 or later. |
| sample_mpeg4.mp4 | MPEG-4 | 232 KB | | Requires QuickTime 6 or later. |
| sample_3GPP.3gp | 3GPP | 28 KB | | Requires QuickTime 6.5 or later. |
| sample_3GPP2.3g2 | 3GPP2 | 28 KB | | Requires QuickTime 6.5 or later. |
| sample_mpeg2.m2v | MPEG-2 | 1 MB | | Requires QuickTime 6 or later and the QuickTime MPEG-2 Playback Component. This component isn't necessary or installable in OS X Lion or later, which includes built-in MPEG-2 functionality. |
